

My XM Radio is very valuable not only for its programming, but also for its weather and traffic channels. When I am on the road away from home I can turn on my XM radio and get local weather and traffic so I can make it to my destination on time and safe. As a paying customer of XM radio, I feel that the National Association of Broadcasters has no right to tell me what I can and can't listen to. They are not paying my subscription for me. I urge you to please to reject the NAB's petition 04-160 to stop the broadcasting of traffic and weather on XM radio. XM radio is a wonderful service that should be utilized by many more people.

Respectfully,

Jimmy Coulas
